

Importing Your Video into iMovie

Follow these instructions to connect your camcorder and import your video. To import your video into iMovie:

1. Connect your camcorder to your computer using a FireWire cable, as shown below. Connect the 6-pin connector to your Mac and the 4-pin connector to your camcorder.

2. Insert the tape with your video footage and switch the camcorder to VTR or VCR mode.
3. Open iMovie and set the mode switch under the iMovie monitor to camera mode, as shown below.

4. Use the playback controls, shown above, to view the tape in the iMovie monitor.
5. Rewind the tape to a few seconds before the point at which you want to start importing.
6. Click the Play button.
7. Click Import when you see the scene at which you want to start importing.
8. Click Stop to stop importing when you have imported the scenes you want to work with. Fast forward, Play, Rewind, Pause, and Stop are all available in Camera mode
