"A line is a dot that went for a walk." - Paul Klee

*Quotes by Artist... "We are in the business of making the kids feel good about themselves and reinforcing self-confidence. Sometimes that little positive reinforcement is enough to change a kid, or at least guide them in a direction towards creating more and more art." ~ Susan on Long Island*

The first kind of PENCIL was a bunch of GRAPHITE sticks held together by string. Then someone decided it would be better to push the graphite into the inside of a hollow wooden stick.

**JOSEPH RECHENDORFER** was the first person to think of putting a piece of rubber onto the top of a pencil which makes it real easy to rub out mistakes.

Did you know that the average lead pencil can draw a line that is almost 35 miles long or you can write almost 50,000 words in English with just one pencil? Amazing fact! Now imagine an eraser that could match it !!!
